

Education

Gati Shakti Vishwavidyalaya, B.Tech. in Artificial Intelligence & Data Science Aug 2023 – May 2027
• **Specialization:** Transportation & Logistics | CGPA: 8.59/10.0

Experience

Applied AI Intern, BISAG-N, Gandhinagar, Gujarat 18 May – 13 Jul 2026
• Built the 3D reconstruction and virtual try-on pipeline for a WebXR digital twin platform aimed at reducing fashion e-commerce returns, achieved 30–60 FPS rendering and 35% lower GPU VRAM usage via a decoupled FastAPI/CUDA microservices architecture combining diffusion-based try-on and 3D mesh reconstruction.
• Built a real-time multi-device VR viewer with spectator mirroring for live try-on sessions — reduced telemetry bandwidth to <2 KB/s and mesh parse latency to <120ms via custom WebGL shaders and containerized deployment.

Machine Learning Intern, CRIS, Delhi, New Delhi 25 May – 25 Jun 2025
• Developed an ML Regressor to predict Rake Turnaround Time at DDU TXR Station, implementing custom feature engineering and congestion metrics, while uncovering critical operational trends through multi-scale EDA (hourly to monthly), delivering data-driven recommendations to reduce rake dwell time and improve wagon utilization at the station.

Indian Railways Intern, DRM Pratapnagar, Vadodara, Gujarat 10 – 25 May 2024
• Learned about telecommunication test-room diagnostics for railways & explored railway signalling systems and safety protocols. Visited railways workshop and coach care centre.

Projects

ParkSight: Bengaluru Illegal Parking Intelligence Platform | Full Stack, ML, Geospatial Analytics Dashboard | GitHub
• Built a full-stack operational intelligence dashboard analyzing **298,000+** parking violations across **802** geohash zones, featuring real-time risk prediction and patrol shift planning; engineered an XGBoost Poisson regression model with **0.56 R²** and **34% RMSE** reduction, served via FastAPI, enabling city traffic authorities to prioritize patrol deployment in high-violation zones.

SecureDocAI: Offline Enterprise Doc. Intelligence System | RAG, SLMs, Info. Retrieval, XAI
• Engineered a fully air-gapped RAG system for semantic QA across **25+** enterprise documents and **35K+** indexed chunks, integrating OCR, FAISS dense retrieval, BM25, and Cross-Encoder reranking with local Phi-3 & Mistral SLMs; developed a research-grade benchmark spanning **125** ques., **7** configs., and **15+** metrics, proposing an Explainable Benchmark Confidence Score, enabling enterprises to deploy trustworthy, fully offline document QA without cloud dependency or data privacy risk.

FolioGPT: Shakespearean Next-Word Predictor | GenAI, Full Stack, Sequence Modeling HFSpace | GitHub
• Built a full-stack next-word prediction platform on Shakespeare's **202,000+** word corpus using LSTM, GRU, 1D CNN, and DistilGPT2 with a sparse target mapping pipeline, reducing GPU VRAM by **99.9% (10GB+ → 1.6MB)** while achieving **36.0% Top-1** and **60.3% Top-5 accuracy**; deployed via Flask + Docker on Hugging Face Spaces.

Skills

Programming Languages: Python, C++, C, SQL, Java
CS Fundamentals: DSA, Object-Oriented Programming/Design, OS, Distributed Systems, Computer Networking, DBMS
AI Fundamentals: Machine Learning, Deep Learning, Computer Vision, Natural Language Processing, GenAI/LLM, Trustworthy AI
Frameworks & Technologies: FastAPI, Docker, RESTful APIs, Redis, MongoDB, MySQL, NoSQL, AWS (learning EC2), TensorFlow, PyTorch, HuggingFace, Java Swing, Streamlit, LangChain, RAG, SLM, LangGraph
Tools: Git, GitHub Actions (CI/CD), Linux, Postman, Supabase, Oracle SQL Developer

Achievements & Leadership

Codeforces Rating: 1390 (Pupil)	Profile link
Finalist in OpenEnv Hackathon at Scaler School of Technology	Meta, Pytorch, HuggingFace Apr 2026
Finalist in Flipkart GridLock 2.0	Flipkart, MapmyIndia, Bengaluru Traffic Police Jun 2026
Top 100 in FarAway Hackathon	Zuup, Unstop June 2026
Programming Domain Head, leading a comprehensive DSA workshop series	Technocrats GSV May-Sep 2025
Secured 2nd Rank twice in University Hackathon	Epitome TechFest Mar 2024 Mar 2025
Organized Code Debugging Competition	Technocrats GSV Feb 2025
Applications of AI for Predictive Maintenance	Nvidia Certificate March 2026
Computer Vision for Industrial Inspection	Nvidia Certificate October 2025
